

Advisory Regarding Meter and Gas Line Extension Fees

The City of Mesa Energy Resources Department (ERD) provides electric and natural gas service to properties in our Mesa and Pinal County service areas. Given that utility rates and fees may be adjusted annually, the ERD wishes to make its customers and area developers, contractors and subcontractors aware of current fee schedules for installation or relocation of natural gas service lines, meter installations, and/or upgrades. Specific fee information is available online at <http://www.mesaaz.gov/city-hall/office-of-management-budget/utility-rates> (Utility Rate Book, page USF - 5).

The current fiscal year Utility Rate Book specifies quote-based fees for change of meter size, service relocations and other natural gas line installations. Job specific fees will be provided to contractors and homeowners upon request. Fees are reviewed annually and are subject to adjustment. For more information, contact one of the Business Development representatives listed below regarding service line, meter installation, and meter change fees.

Fees are collected by City of Mesa ERD prior to natural gas service line and meter installation or meter change and are separate from deposits required to establish a natural gas account and/or building permitting fees.

Thank you for supporting the use of natural gas in our community.

Respectfully,
ERD Business Development
